DESIGN YOUR OWN FLAG!

Tips and Ideas:

To create straight lines grab a ruler or another sheet of paper.

Use a ruler to mark the center of your flag.

Not sure what colors work together? Use a scratch paper to look at different colors next to each other to pick the right shade.

Complementary color combos include: red and green, yellow and purple, and blue and orange.

Will your flag have any text? If it does be sure to test out your text on a scratch paper first. Maybe try different fonts!

You can collage your design by cutting construction paper and gluing shapes onto the rectangle above

Don't limit yourself to markers or crayons. Think about other ways you could color your flag. Maybe try glue and glitter, highlighters, watercolors, or even stickers!
